SWITCH

Switches communicate an action a user can take. It is a control that is used to quickly switch between two possible states. Use them to:

- Toggle a single option on or off.
- Inmediately activate or deactivate something.

States

These are the different states you can find the switch component.

Spacing

The vertical spacing starts from the path limit of the longest option. For more than three options, the switches should be disposed in:
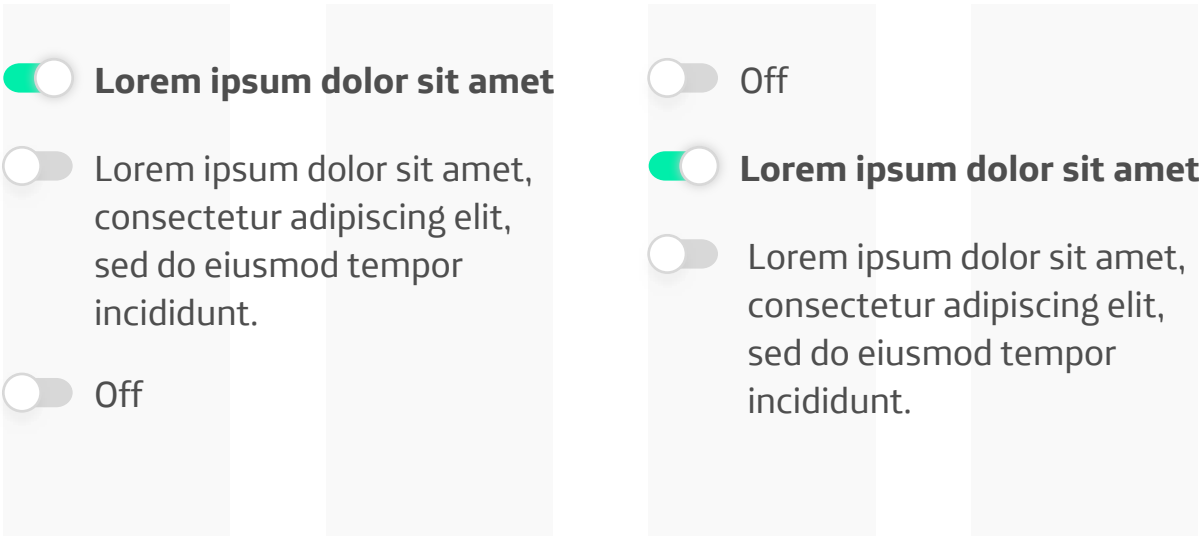

- Mobile: 2 columns.
- Tablet: 2 - 4 columns.
- Desktop: 2 - 4 - 8 columns.

You can find more info about the column system in the Layout page.
