# RADIO BUTTONS

Radio buttons allow users to see all available choices at once and select exactly one option.
Radio buttons should:
- Always be used with an associated label component.
- Include at least two or more choices.
- Are used to select only one option.
- If available options can be collapsed, consider using a dropdown menu instead, as it uses less space.
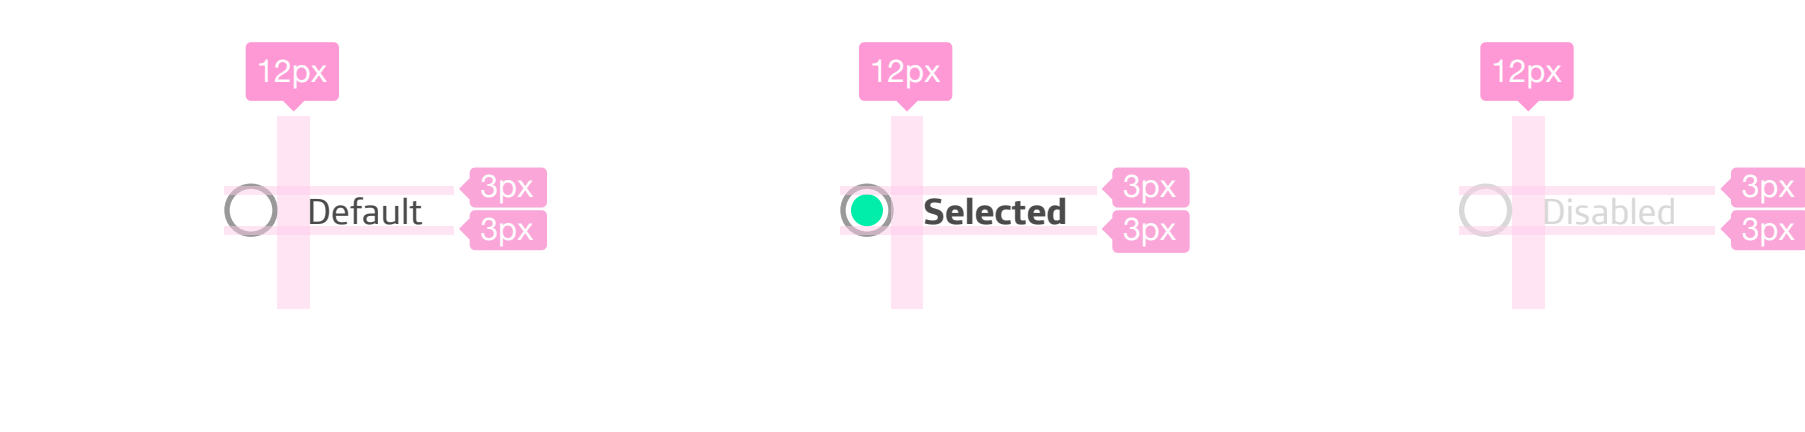

States

These are the different states you can find the radio buttons.

○ Default   ◉ **Selected**   ○ Disabled

Disabled
- color: #D8D8D8 100%
- font-face: Telefonica-Regular
- font-size: 16px
- border: #D8D8D8 1px

Spacing

The vertical spacing starts from the path limit of the longest option. For more than three options, the switches should be disposed in:
- Mobile: 2 columns.
- Tablet: 2 - 4 columns.
- Desktop: 2 - 4 - 8 columns.

You can find more info about the column system in the Layout page.
